

# Turnkey applications and custom automated solutions

Transform your automation process with quick-turn applications, leveraging modular designs and stocked lead times to accelerate project ROI.

## 7th axis

Robot-agnostic solution to increase the reach of your small to medium payload cobot with a range extender. Compatible with UR and FANUC.

## Palletizer

Modular and cost-effective solution featuring customizable configurations, with an intuitive MachineApp and operator interface.

## Bin picking

Custom Bin Picking streamline automation and accelerate machine vision setup with Vention's extensive library of 1,000+ modular components,

## Case erector

Combining speed and simplicity, box erecting can be tailored to match your exact production needs. Featuring extra-large magazines, the solution allows you to form enough boxes for 2 pallets without refilling.

## Overhead 7th axis

Increase the reach of your small to medium payload cobot in limited spaces with a floor- or ceiling-mounted overhead range extender. Compatible with UR and FANUC.
